Allspring (Lux) Worldwide Fund - Climate Transition Global Equity Fund,
a Sub-Fund of Allspring (Lux) Worldwide Fund
Class I (GBP) Shares - acc. (LU2332864946)
Management Company: Allspring Global Investments Luxembourg S.A.

Objectives and Investment Policy

The Sub-Fund seeks long-term capital appreciation. The Sub-Fund promotes environmental and/or social characteristics but does not have a sustainable investment objective. The Sub-Fund invests at least two-thirds of its total assets in equity securities of companies located worldwide. Under normal market conditions, the Sub-Fund invests in equity securities of issuers located in at least five different countries, including the U.S. The Sub-Fund may also invest up to 20% of its total assets in equity securities through ADRs, CDRs, EDRs, GDRs, IDRs and similar depository receipts as well as equities denominated in US Dollars issued by Non-US Issuers. In terms of environmental characteristics, the Sub-Investment Manager will use a combination of data from providers that specialise in climate data and internal analysis to construct a portfolio of global companies that the Sub-Investment Manager believes are well positioned for a transition to a decarbonised economy by investing in companies within the MSCI All Country World Index identified as being aligned with an average global temperature increase of 2 degrees Celsius or less. The Sub-Fund will target to decarbonise by 2050. This is intended to be achieved by initially setting a cap on the weighted average carbon intensity for the Sub-Fund that is lower than that of the MSCI All Country World Index. The cap will reduce along a trajectory that will decline in order to decarbonise the Sub-Fund by 2050. Through the use of a negative screening process, the Sub-Fund seeks to exclude securities in accordance with its exclusion policy. A copy of the methodology and list of excluded investments (including the revenue thresholds) is available under allspringglobal.com. Shareholders may also request a copy from the Fund or the Management Company. The Sub-Investment Manager may also use futures, forward contracts, options, or swap agreements, as well as other derivatives, for hedging or efficient portfolio management purposes.

The Sub-Investment Manager then employs a “quantamental” investment approach to the list of companies identified as being aligned with an average global temperature increase of 2 degrees Celsius or less, utilising a combination of quantitative methods and fundamental analysis to identify companies based on valuation, quality and momentum characteristics that give a comprehensive view of each company’s relative valuation, operational and financial performance, and stock price behaviour. The Sub-Investment Manager’s approach seeks to achieve positive excess returns relative to the MSCI All Country World Index by using stock selection to take controlled active risks in the portfolio including sector and regional relative weights.

This share class does not distribute dividends. Income is reinvested in the Sub-Fund.

You may sell your shares on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a “Business Day”).

The Sub-Fund is actively managed but uses the MSCI All Country World Index as a reference for selecting investments and for performance comparison. The investments of the Sub-Fund may deviate significantly from the components of and their respective weightings in the benchmark.

Risk and Reward Profile

This rating system is based on the volatility of the Sub-Fund’s returns over the past 5 years, using returns for an appropriate index for periods before the start of the class. Please note past returns may not be a reliable indicator of the future risk and reward profile of the Sub-Fund; the rating may change over time based on future returns; and category 1 does not mean a risk-free investment.

Lower Risk < Typically Lower Rewards Typically Higher Rewards > **Higher Risk**

1	2	3	4	5	6	7
---	---	---	---	---	----------	---

The class is in category 6 because the average amount returns varied each year over the past 5 years was equal to or above 15.0% and less than 25.0%.

The following additional risks may impact the Sub-Fund’s returns:

Counter-Party Risk - The Sub-Fund may incur a loss if the other party to an investment contract, such as a repurchase or reverse repurchase agreement or certain derivative contracts, fails to fulfill its contractual obligation to the fund.

Custodial and Sub-Custodial Risk - Since the Sub-Fund may invest in markets where custodian and/or settlement systems are not fully developed, the Sub-Fund’s assets may be exposed to risk in circumstances whereby the custodian will have limited or no liability.

Derivatives Risk - The use of derivatives such as futures, options and swap agreements, can lead to losses, including those magnified by leverage, particularly when they are used to enhance return rather than offset risk. In addition, there may be an absence of a liquid market for any particular instrument at any particular time.

Emerging Markets Risk -The risks for investments in non-U.S. securities are greater in emerging markets, which can be more vulnerable to recessions, currency volatility, liquidity risk, inflation and market failure.

Market Risk - The market price of securities owned by the fund may go up or down, sometimes rapidly or unpredictably. A security may decline in value due to factors affecting the issuer or securities markets generally or particular industries represented in the

securities markets.

Smaller Company Securities Risk - Securities of companies with smaller market capitalisations tend to be more volatile and less liquid than larger company stocks.

The Sub-Fund may not achieve its objective and/or you could lose money on your investment in the Sub-Fund. For more information about the Sub-Fund's risks, please see "Risks" and "Risk Management Processes" in the prospectus, which is available at allspringglobal.com.

Charges for this Sub-Fund

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested.	

Charges taken from the Sub-Fund over a year
