## What is this product?

<b>Type</b>	Allspring (Lux) Worldwide Fund (the "Fund") is a Societe d'Investissement à Capital Variable (SICAV) composed of several separate sub-funds organised under the laws of Luxembourg.
<b>Term</b>	The Fund has been established for an indefinite period of time. The PRIIP Manufacturer reserves the right to liquidate the Fund, subject to approval by the Board of Directors.

<b>Objectives</b>	<p>Allspring (Lux) Worldwide Fund - U.S. Short-Term High Yield Bond Fund (the "Sub-Fund") seeks total return, consisting of a high level of current income and capital appreciation by investing, under normal market conditions, at least two-thirds of its total assets in corporate debt securities that are below-investment-grade (i.e., rated lower than Baa by Moody's or lower than BBB by Standard &amp; Poor's or, if unrated, determined to be of comparable quality by the Sub-Fund), at least 75% of its total assets in debt securities of U.S. issuers, up to 25% of its total assets in U.S. dollar-denominated debt securities of non-U.S. issuers, and up to 20% of its total assets in asset-backed securities. U. S. debt securities are securities: (1) issued by companies with their principal office in the United States or exercising a predominant part of their economic activities in the United States; or (2) issued by U.S. governmental issuers. The Sub-Fund invests principally in below-investment-grade debt securities (often called "high yield" securities or "junk bonds") of U.S. corporate issuers that are rated BB through B by Standard &amp; Poor's or Ba through B by Moody's or an equivalent quality rating from another U.S. nationally recognized statistical ratings organization, or are deemed by the Sub-Fund to be of comparable quality. While the Sub-Fund may purchase securities of any maturity, under normal circumstances, its U.S. dollar-weighted average effective maturity is expected to be three years or less.</p> <p>The Sub-Fund may also use futures, forward contracts, options or swap agreements, as well as other derivatives, for hedging, efficient portfolio management or investment purposes.</p> <p>The Sub-Fund focuses on selecting individual securities that may potentially add value from income and/or capital appreciation, primarily using a bottom-up fundamental credit analysis to generate new ideas and to understand the potential risks.</p> <p>You may redeem your investment upon demand on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a "Business Day").</p> <p>This share class does not distribute dividends. Income is reinvested in the Sub-Fund.</p>

## Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: in 2025 you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

Investment USD 10,000		
Scenarios	If you exit after 1 year	If you exit after 3 years
<b>Total costs</b>	78 USD	258 USD
<b>Annual cost impact(*)</b>	0.8 %	0.8 %

(\*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at maturity your average return per year is projected to be 3.8% before costs and 3.0% after costs.

## Composition of costs
